SLAYCO 96

KNEE PAD

AXELL HODGES SIGNATURE KNEE PAD

The SLAYCO 96 Knee Pad is a low profile CE LEVEL 2 certified knee pad. This knee pad promotes increased endurance with less fatigue, allows for maximum airflow, the ability to squeeze and feel the bike, ability to go lower into corners with more leg flexibility, and generally more mobility on the bike. A favorite among freestyle mx, motocross, and dual sport riders alike.

- + **RMF – Reactive Memory Foam** is soft and pliable in its natural state but hardens when force is applied to it, providing a protective barrier that meets CE 1621-1 LEVEL 2 protection
- + **BIO-FOAM** – Molded bio-foam bordering the knee cup and shin provides increased impact protection while the strategically placed bio-foam wing promotes bike hugging inner and outer knee protection
- + **TRAC GRIP** – Tacky silicone grippers are strategically placed in key areas to help hold the knee pad in place and provide necessary protection for, not if, but when you go down
- + **HEXPRENE** – Class-leading engineered fabric from the aviation industry, provides zonal support and maximum airflow, while still providing ample protection
- + Moto-engineered specifically for cut and abrasion knee cover material paired with our RMF pad
- + An additional inner sleeve provides the knee with additional support and stability
- + CE level 2 certified

KNEE BRACE

THE CROWN JEWEL OF KNEE BRACES

- + Rigid carbon frame with strategically placed metal inserts for durability
- + Hyperextension Lockout 30 prevents the most common knee injury in action sports
- + Flex-wings adapt to leg forms and shapes
- + Self-centering patella cap for impact protection and unrestricted flex
- + Primary and secondary shells for complete knee protection
- + Anatomically engineered internal shape
- + PU foam for impact protection with engineered hexagonal pattern
- + 4 individual compression straps for precise fit
- + Clip receivers integrated into frame
- + Internal comfort padding with silicone grip pattern
- + Extreme light weight
- + CE 1621-1 and EN 1621-1 certified

NEW

GENESIS

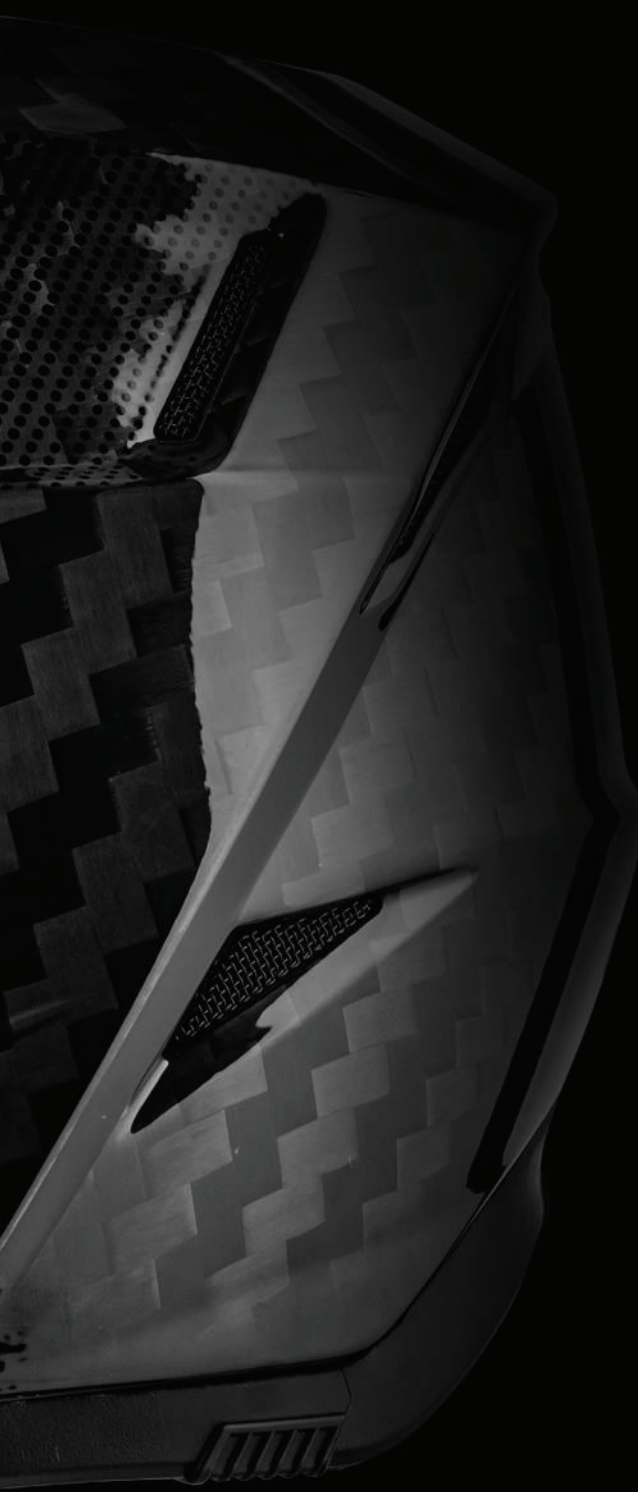

YOUTH KNEE BRACE

A NEW GENERATION FOR THE YOUTH KNEE

- + Reactive Memory Foam (RMF) for impact protection
- + Fully adjustable bilateral polycentric (6061 T6) aircraft grade aluminum hinges
- + Hexprene provides zonal support with maximum airflow and abrasion protection
- + Rigid thigh and shin panels for optimum support
- + Individual compression straps for precise fit
- + Ventilated channels for comfort and airflow
- + Wide range of fit
- + CE EN 1621-1 impact protection

LEGACY PRO

MX GOGGLES

Leading the pack from holeshoot to checkered flag is our high-impact resistance LEGACY PRO, delivering clear vision, wide view, comfortable fit, and race ready protection for riders who put a premium on MX vision protection. Innovative features like the ergonomic injection molded AirFlex frame and multi-density, fleece-lined foam ensures a comfortable fit while defining a new era in MX goggle technology.

- + Shatterproof HD, optically-correct ClearView Polycarbonate lens
- + Anti-fog, anti-scratch lens with F2 coating
- + Premium injection molded AirFlex frame conforms to your face
- + Race-ready to accommodate laminated tear-offs with tearoff pins
- + Ultra-wide adjustable 45mm elastic strap with maximum grip
- + Custom outriggers with optimum pressure distribution
- + Ventilation ports strategically placed for airflow and fog-free clarity
- + Plush triple-layer, fleece-lined molded foam wicks away sweat
- + Removable nose guard for extra roost protection
- + Engineered to fit most helmets securely without compromising fit
- + Meets EN 1938 standard

EVS GOGGLE LENS

You need to see the track to lead the pack. Our premium shatterproof HD lenses are specifically designed for motocross riders who demand unrivaled optical clarity and protection. Rigorous testing has led to a proven polycarbonate molded lens that can take a roost from the rockiest tracks delivering remarkable protection with zero optical distortion. Easily swap out the lens color that matches your conditions.

LENS CHART

Solar Flare Lenses VLT Rating: 8-18%

UV Rating: Category 3

Riding Conditions: The lowest VLT of all tinted lenses, the solar flare lens is for sunny, extreme glare days. These are ideal for sand dune and snow riding where there is extreme glare and sun. The view through the solar flare lens will also appear natural but with a slightly darker tint.

SOLAR FLARE

Smoke Lenses VLT Rating: 18-43%

UV Rating: Category 2

Riding Conditions: The neutral tint, dark smoke motocross lens is just like looking through a pair of dark sunglasses. The smoke lens is used for sunny days with a high to extreme glare factor. You can use these as an alternative to the mirror lenses if you prefer lenses without mirroring.

SMOKE

Silver Mirror Lenses VLT Rating: 18-43%

UV Rating: Category 2

Riding Conditions: The silver mirror lens is designed for sunny days with little to no clouds and with a medium to high glare factor. Great for direct sun and bright sunny days.

SILVER MIRROR

Plasmatic, Blue, Green Lenses VLT Rating: 18-43%

UV Rating: Category 2

Riding Conditions: You would use the plasmatic, blue, and green mirror for cloudy, high glare riding days. These mirror lenses give you good depth perception and deflects the glare while brightening shadows, and improving contrast in low-light. These are great all round lenses for both shade, mud and medium light, sunny/cloudy conditions.

PLASMATIC

BLUE

GREEN

Clear Lenses VLT Rating: 80-100%

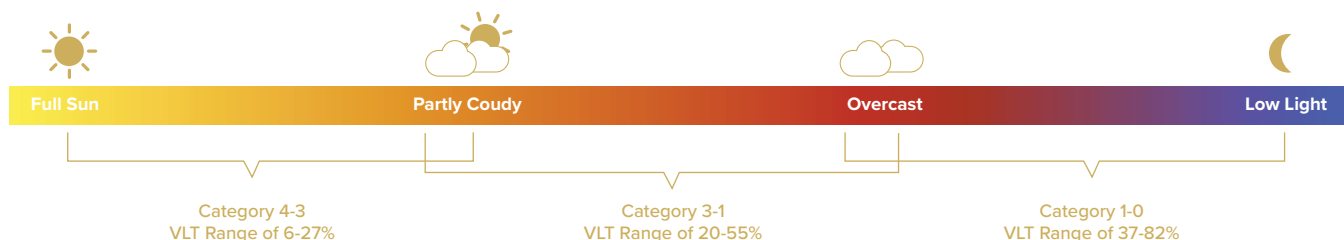

UV Rating: Category 0

Riding Conditions: Clear motocross lenses have no tinting and let in 90% of all light into your vision. They are good for evening use or very low light, no glare, and overcast days.
