TAPER BARS

ENGINEERED FLEX TECHNOLOGY

ENGINEERED FLEX TECHNOLOGY (EFT) is designed to give a small amount of flex in the bars. Carefully selecting an inner wall thickness of 5mm through the rise and taper area of the bars helps to reduce the effects of jarring in large impacts whilst providing the rider maximum front-end feel in corners.

OVERSIZE TAPER EXTENSION

OVERSIZE TAPER EXTENSION (OTE) is a lengthening of the central oversize (28.6mm) section. Increasing the oversize section to run past the final bend in the handlebar adds significant strength to the weakest part of any handlebar, couple this with a 5mm wall thickness that stays consistent even on the outside of the bends and the F7 taper bars are some of the lightest yet strongest bars on the market.

PROGRESSIVE DAMPING CONTROL

PROGRESSIVE DAMPING CONTROL (PDC) is created using a larger wall thickness of 5.3mm on the handlebar grip area, this has been calculated to balance and dampen against the effects of handlebar vibration. This is a similar principal to the handlebar weights used in sports bikes but is specifically designed and tested to suit the vibration range produced by modern high performance 4 stroke motocross bikes.

PRO SERIES

F7 Taper Bars are manufactured from 7075-T6 aluminium and feature Oversize Taper Extension (OTE) to give the ultimate strength and crash resistance, whilst Engineered Flex Technology (EFT) and Progressive Damping Control (PDC) helps provide just the right amount of flex and reduces machine vibration to help combat rider fatigue.

F7 TAPER BAR

RFX Grips are manufactured from high spec synthetic kraton polymer and feature the vibration reduction benefits and stickiness of natural rubber but resist damage caused by sunlight and chemicals that occur with natural rubber.

RFX Grips feature a dual density design which allows for an external 60 SA compound that is more durable and resists crash damage. Yet has a soft centre 25 SA compound grip area for the best vibration resistance and comfort available.

RFX Grips use the industry standard half waffle design with a level RFX logo on the palm, this upper diamond and lower waffle design gives the best combination of palm area comfort and lower grip for muddy conditions.

GRIPS

PRO SERIES

Smooth diamond pattern and level RFX logo on the palm area

60 SA end compound improves crash damage resistance

FEATURES

- Made using high spec synthetic kraton polymer for the ultimate sticky grip
- Dual compound tool design allows for the best combination of compounds
- 25 SA centre compound improves comfort and reduces vibration
- 60 SA end compound improves crash damage resistance
- Half waffle design gives the best combination of grip and comfort
- Smooth diamond pattern and level RFX logo on the palm area offer excellent grip without sacrificing comfort and causing blisters
- Available in 26 colour combinations
- Packaged in pairs for use with right hand twist throttle machines

RFX Pro Series Factory Edition Clutch Lever Assemblies have been designed and tested with the help of top UK professional race teams.

The aim was to produce a lever assembly that is extra strong, includes an oversize quick adjuster for ease of adjustment when riding, a rubber boot that covers all the internals of the lever increasing service intervals, a lever with a pivot point bearing and a lever ratio that provides a positive yet light clutch actuation.

HARD ANODISED

CNC MACHINED

6061-T6 BILLET

RFX Pro Series Throttle Tubes are machined from billet aluminium and feature a sealed bearing and Teflon sleeve to provide an effortless throttle action. RFX Pro Series Tubes resist damage in a crash unlike standard plastic tubes. For these reasons they are used by many of the top race teams and riders in the U.K Championships such as STR KTM.

FEATURES

- Replacement throttle tubes for all popular off road bikes.
- Uses the same cam profile as the OEM part for proper throttle control.
- Hard anodised billet aluminium construction.
- Sealed ball bearing and Teflon sleeve virtually eliminate friction.
- Laser etched with RFX logo.
- Knurled grip mounted area.
- Reduced chance of damage if you crash.

GEAR LEVER

FLEX+ CNC GEAR LEVER

PRO
SERIES

FEATURES

- New Anti-Stick folding gear tip
- New enclosed tip design
- New low profile gear tip bolt
- CNC machined shaft and tip for increased strength
- Knurled tip for improved gear shifts
- Stainless steel spring & Pivot to resist corrosion
- Laser etched RFX logo

FOR FITMENT CHARTS AND PRODUCT CODES SEE PAGE 164-165

FORGED GEAR LEVER

RACE SERIES

RFX Race Series Gear Levers are the leader in OEM replacement gear levers.

Manufactured from high quality forged aluminium for improved strength and durability with spring loaded forged knurled tip for improved gear shifts.

FEATURES

- Forged aluminium shaft
- Forged knurled tip
- Lazer etched RFX logo
- Colour anodised for that factory look
- Stainless steel hardware

FOR FITMENT CHARTS AND PRODUCT CODES SEE PAGE 164-165

RFX Pro Series Brake Pedals are designed and tested at the highest level.

Pro Series Brake Pedals are manufactured from 7075-T6 aluminium alloy and feature an OEM type forged shaft, a smooth finish on the shaft helps to reduce the wear associated with a ridged design.

Pro Series Flexible Tips are CNC machined billet aluminium and feature a spring loaded rotatable tip which under impact such as in a rut will spin to reduce damage. The tip also features steel teeth to help grip in muddy conditions.

Pro Series Flexible tips also incorporate a stop on the pivot tip, this stops the tip at 90 degrees of rotation preventing damage that can occur if the tip rotates under the clutch cover.

Pro Series Brake Pedals also incorporate a cable brake snake, this helps prevent the pedal shaft being bent around in a collision.

REAR BRAKE PEDALS

FLEXIBLE TIP BRAKE LEVER

PRO
SERIES

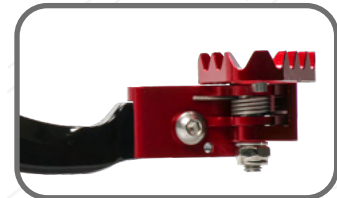

CNC MACHINED

7075-T6 BILLET

FEATURES

- 7075 aerospace aluminium construction
- T6 heat treated to increase tensile strength
- Forged shaft for increased core strength
- Smooth shaft design to reduce surface wear
- CNC machined billet flexible tip
- Rotating action reduces impact damage
- Steel insert teeth for increased grip
- Mechanical stop on the tip
- Incorporated brake snake
- Colour anodised to prevent corrosion
- Laser etched logo

RFX Pro Series Shark Teeth
Footrests are all new and feature a revolutionary tooth design. Forward and backward facing teeth help increase rider grip even when the teeth start to wear, this is a major advantage over previous designs which relied on the sharpness of the teeth to hold the rider firmly to the pegs.

The minimalist inner brace design helps reduce weight and offers exceptional mud clearance. This design is only achievable using aerospace grade 7075 aluminium and T6 heat treatment.

The teeth are fully replaceable and are held in using only three bolts, enabling the footrest to be easily cleaned and kept in the best condition.

Factory Edition versions are available in a hard anodised Titanium grey, these give the footrest the ultimate in wear resistance.

RFX Pro Series Shark Teeth Footrests are available for all late model motocross and enduro bikes.

RFX Pro Series products are designed and tested with the help of top UK and International race teams.

**FACTORY
EDITION**

HARD ANODISED

CNC MACHINED

7075-T6 BILLET

FEATURES

- Shark teeth style forward and rearward facing teeth for the ultimate grip
- Minimalist centre design for reduced weight and mud clearing
- 57mm wide platform
- Easily replaceable teeth with just a three bolt installation
- 304 Stainless steel teeth for reduced service intervals
- CNC machined from aerospace grade 7075-T6 heat treated aluminium
- Available for all late model motocross and enduro bikes
- Hard anodised for ultimate wear resistance
- RFX Laser etched Logo
- Tested by top UK and International race teams

FOOTRESTS

TITANIUM FOOTRESTS

PRO SERIES

NEW to the RFX range, RFX Pro Series Titanium Footrests offer maximum strength and durability at approximately half the weight of factory fitted steel footrests.

The high strength to weight ratio of titanium allows for a wider profile and thicker teeth for optimal grip and reduced boot wear.

Manufactured from aerospace grade Ti-6AL-4V Titanium and tig welded by hand by highly skilled welding engineers to produce strong, stress-free welds.

Ti-6AL-4V

TIG-WELDED

FOR FITMENT CHARTS AND PRODUCT CODES SEE PAGE 168-169

FEATURES

- Aerospace-grade Ti-6AL-4V Titanium.
- Tig-Welded construction.
- Lightweight.
- Hand fabricated for high precision.
- Reduced Boot Wear
- Wide profile.

RESERVOIR CAP KIT

RFX Pro Series Reservoir Covers are CNC machined from aerospace aluminium and are a perfect factory style replacement to your standard reservoir covers.

FEATURES

- CNC machined from aerospace grade aluminium
- Tighter tolerances than OEM cast part
- Highly polished then colour anodised for that factory look
- Laser etched RFX logo
- Available in a variety of colours for a wide range of models
- Also available KTM clutch reservoir covers to accept standard hot start levers longer life

Cap Kits are also available for **Gas, Gas, Beta, Sherco & Fantic**. See fitment charts on page x

FORKS

FORKS

LAUNCH CONTROLS

RFX Launch Controls allow you to lower and lock the front suspension to stop the front wheel lifting under hard acceleration off the start gate.

CNC Machined from billet aluminium and featuring a hinged design to eliminate fork leg removal on installation, steel catch to reduce wear and a four bolt plunger to resist stone damage.

DUAL BUTTON:

The new dual button design allows rider preference in different conditions and features a new plunger which is machined further away to give greater clearance on new KTM models but also has extra reach to ensure max engagement. The new hinged latch design eliminates snag on the rear of the fork guard by replacing the rear bolt with two smaller bolts in the front. New deeper profile catch eliminates false disengagement when crossing the start gate. Hinged design also allows easy installation.

HARD ANODISED

CNC MACHINED

7075-T6 BILLET

FEATURES

- CNC machined from billet aluminium
- Hinged design to eliminate fork leg removal on installation
- Steel catch to reduce wear
- Four bolt plunger to resist stone damage

DUAL BUTTON:

Button

- Allows for rider preference in different conditions
- Plunger sits further away to give greater clearance (KTM) and has extra reach to ensure max engagement
- Low profile design is only 20g heavier than single button
- Four bolt design for greater security
- CNC Aerospace grade billet aluminium construction
- Hard anodised colour

Latch

- Two bolt design ensures no hindrance on fork guard
- Deeper profile latch ensures maximum hold
- Easy installation due to hinged design
- CNC Aerospace grade billet aluminium construction
- Hard anodised colour
- RFX laser etched logo
- Tested by top UK race teams

FORK ACCESSORIES

FORK AIR BLEEDERS

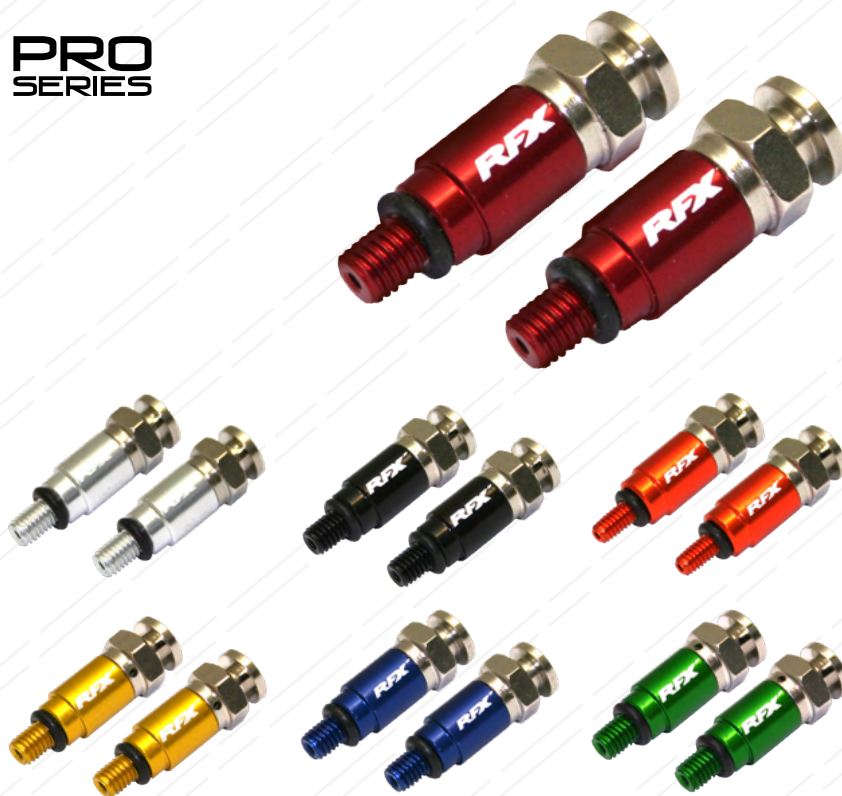

RFX Pro Series Fork Air Bleeders allow you to remove the excess air from both original cartridge and modern dual chamber forks (not for use with air forks). This allows for proper operation of the forks as excess air makes the forks feel harder than normal and can eventually lead to the seals failing.

FEATURES

- Ensures proper fork operation
- Quick installation
- No tools required to operate once installed
- CNC Aerospace grade billet aluminium
- RFX laser etched logo
- Tested by top UK race teams

FORK SEALS

RFX offer a wide range of fork seals to suit most MX & Enduro Models. Seals are manufactured from high quality base materials and are made to OEM specification, to guarantee quality & durability. RFX Fork Seal Kits come in a pack of two.

RACE SERIES

FOR FITMENT CHARTS AND PRODUCT CODES SEE PAGE 124-148

UPPER FORK GUARDS

Fork Protection Redefined. Forkshrink brings 360° protection to expensive and very important upside down forks. The result of 2 years of extensive development and real-world testing, Forkshrink is unlike any product on the market today.

Made from a unique toughened polymer for all round protection from wear, Forkshrink features an internal glue lining to ensure the the product stays put and protects the most vulnerable areas.

Forkshrink offers protection for both new and old forks; keeping newer forks looking fresh and masking imperfections on older ones. Forkshrink also protects the areas of the fork uncovered by decals, including the rear area and the crucial oil seals.

FEATURES

- Made from a unique toughened polymer which offers 360° bespoke protection for your forks
- Glue lined internally which ensures this product stays put
- Protects the areas most vulnerable to damage when fitted to your forks
- Masks the imperfections on old forks and protects them from further wear
- Protects new forks against future wear and tear
- Covers the rear area of the fork and all the ridges including those that house all the important oil seals
- Ensures all areas are covered correctly by bespoke shrinking to the exact required size from the initial fitting

GENOT

RFX Pro Series Ignition Covers are CNC machined from a solid billet of 6061-T6 aluminium which allows thin, lightweight sections to be machined whilst still increasing strength and durability over standard covers. This helps to resist damage from stones/rocks/footrests and gear pedals which can put a hole in a standard cover.

Pro Series Covers also feature an extra tough dark titanium grey Akadized surface treatment which drastically increases the wear resistance from boots and grit to give a lasting stylish look.

RFX Pro Series Clutch Covers are manufactured to increase oil capacity and circulation improving clutch performance and longevity. Featuring a deeper profile to increase oil capacity by 100cc helps reduce oil temperature in long races especially in extreme muddy/sandy conditions where clutch abuse is most common. Selected models also feature an internal scoop to increase oil flow to the centre of the basket.

RFX Pro Series Clutch Covers are CNC machined from a solid billet of 6061-T6 aluminium which allows thin lightweight sections to be machined whilst still increasing strength and durability over standard covers. This helps to resist damage from stones/rocks/footrests and brake pedals which can put a hole in a standard cover.

**FACTORY
EDITION**

AKADIZED

CNC MACHINED

6061-T6 BILLET

FEATURES

- 1.5mm deeper profile for increased oil capacity
- Inner scoop design on selected models
- Reduced oil temperature
- High grade 6061-T6 aluminium
- CNC machined
- Ultimate durability and strength
- Lightweight
- Hard wearing akadized surface treatment
- Lasting stylish look

OIL & FUEL ACCESSORIES

OIL DRAIN BOLTS

RFX Pro Series Fork oil drain bolts contain a magnet to attract any metal debris floating in the oil, which helps to prolong the life of the engine and gearbox.

Manufactured from lightweight 6061-T6 aluminium alloy and colour anodised for that factory look.

CNC MACHINED

6061-T6 BILLET

FEATURES

- Magnet catches metal contaminants in oil to prolong engine life
- CNC Machined from aluminum 6061-T6 with a lightweight design

ENGINE ACCESSORIES

ENGINE TIMING PLUGS

RFX Pro Series Engine Timing Plugs are manufactured from 7075-T6 aluminium for increased dimensional stability under high heat and pressure conditions.

CNC machined for tighter manufacturing tolerances helps these plugs stay in place over standard plastic plugs which are prone to failing.

RFX engine plugs also feature handy 8mm and 6mm hex key heads for easier installation.

CNC MACHINED

7075-T6 BILLET

FEATURES

- 7075-T6 aluminium construction
- 8mm and 6mm hex key head
- Colour anodised
- Lightweight hollow design
- Accepts OEM O-rings

RAKKE

BERAKES

RFX Race Series Discs are designed and tested at the highest level by top World and British championship race teams.

Precision laser cut from high grade stainless steel and heat treated for wear resistance, RFX Discs also feature a special comaxit heatproof coloured finish on non-wear faces for the best corrosion resistance.

RFX Race Series Discs are surface ground to within 0.01mm for instant brake feel and reduced fade.

RFX Race Series Discs are the new price leader in OEM replacement brake discs.

BRAKE DISCS

RACE
SERIES

FEATURES

- Laser cut from high grade quality stainless steel
- Heat treated to withstand excessive brake pad wear
- Comaxit coating (metal colour surface treatment)
- CAD designed profile for lightness and reduced unsprung weight
- Wave design ensures maximum pad cleaning
- Precision cut vented holes and wave design dissipate heat

FOR FITMENT CHARTS AND PRODUCT CODES SEE PAGE 180-184

BRAKE PADS

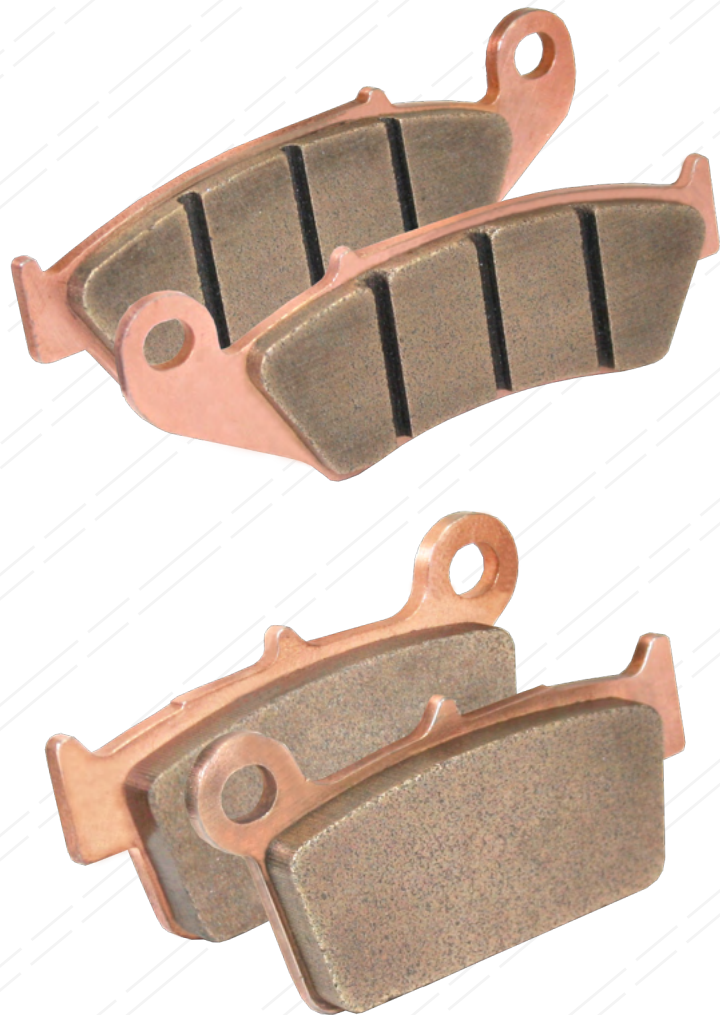

**PRO
SERIES**

Pro Series sintered copper Brake Pads are designed and tested at the highest level. A superior compound of elements are used to produce brake pads with exceptional stopping power, superior resistance to heat fade and a quick bed in time.

The sintered fully metallic copper formula is tested specifically to suit the motocross and off road pro rider. Our Pro Series brake pads provide stopping power and brake feel in excess of OEM brake pads, with the added benefit of improved pad life in the harshest wet mud and sand conditions.

FEATURES

- Premium sintered blend of elements with a large percentage of copper
- Provides exceptional stopping power
- Reduces heat fade in harsh braking conditions
- Facilitates quick bed in time
- Vacuum heat press manufacture ensures top quality adhesion to the backing plate
- Selected models supplied with a heat dispersing rear shield as OEM
- Suitable for all motocross and enduro machines from
- 50cc - 600cc

DRIVE CHAIN

REAR SPROCKETS

ELITE REAR SPROCKET

Designed and tested at the highest level by top World and British championship race teams.

CNC manufactured from 7075 aerospace grade aluminium and featuring mud clearing grooves for maximum wear resistance and improved chain life.

RFX Elite Rear Sprockets feature a CAD designed profile and include a solid inner ring, this increases torsional strength and reduces flex and pressure on bolt holes.

CNC MACHINED

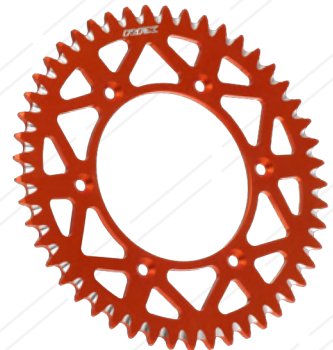

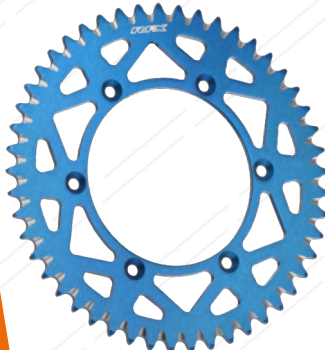

7075-T6 BILLET

FEATURES

- Laser etched RFX logo
- CNC machined from 7075 aerospace aluminium
- Mud clearing grooves for longer lasting sprocket life
- Colour coded for each bike model
- CAD designed profile for lightness
- Rigid design increases torsional strength
- Tighter tolerances improve performance
- Colour anodised for that Factory Bike look
- Various colours available for all models

**PRO
SERIES**

FOR FITMENT CHARTS AND PRODUCT CODES SEE PAGE 190-195

ARMALITE REAR SPROCKET

Featuring a new dual ring design, long lasting high carbon steel outer teeth and reduced weight as a result of a 7075-T6 aluminium centre, this provides the ultimate in sprocket performance.

Armalite sprockets also feature a hexagon drive interface between the inner and outer ring. This is revolutionary technology for sprockets and maximises drive between the two parts and reduces the force on the rivets to zero, in comparison to other items on the market.

CNC MACHINED

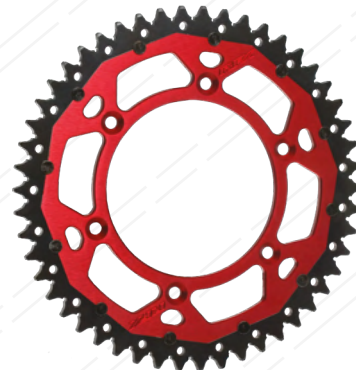

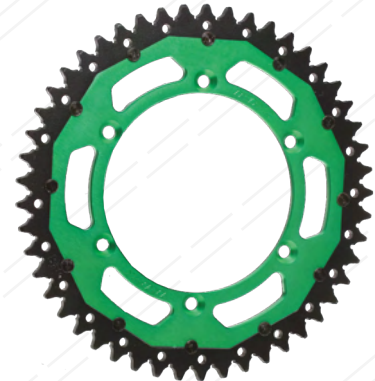

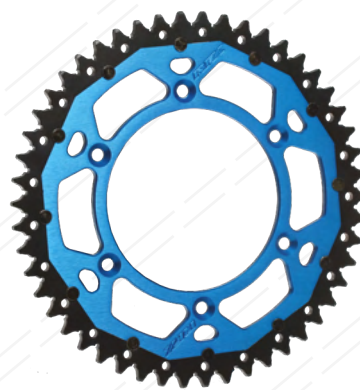

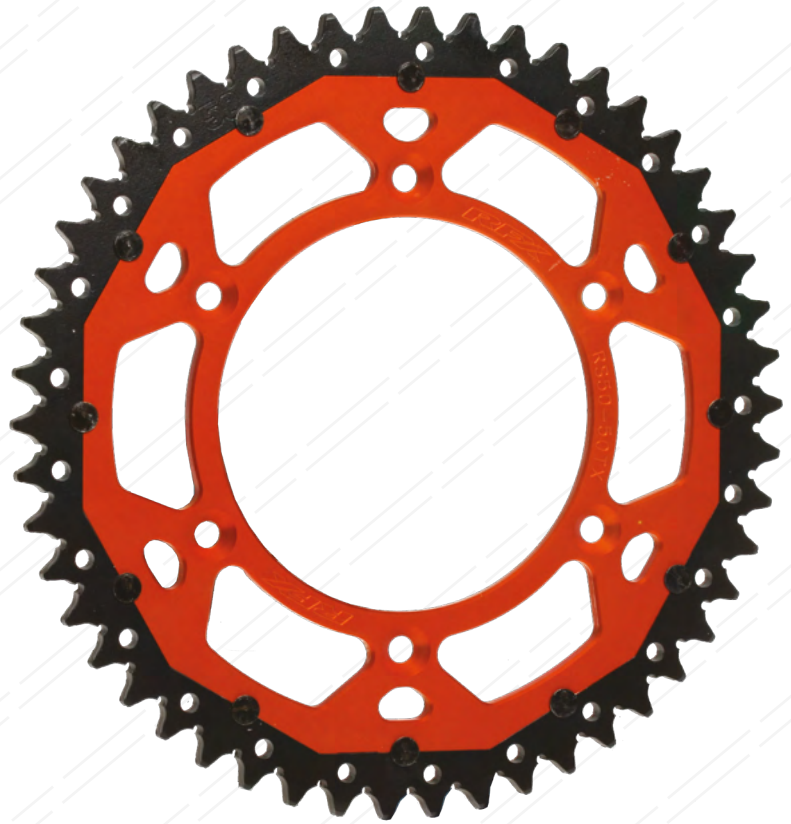

7075-T6 BILLET

HIGH-CARBON
STEEL

FEATURES

- CNC 7075 aerospace aluminium inner ring
- HCS outer ring
- Hex-Drive location between inner & outer ring
- CAD designed profile for lightness
- New style mud clearing grooves to reduce wear
- Rigid design increases torsional strength
- Colour anodised for that Factory Bike look

FOR FITMENT CHARTS AND PRODUCT CODES SEE PAGE 190-195

REAR SPROCKETS

HCS REAR SPROCKET

RFX Pro Series Hi-Carbon Steel (HCS) Rear Sprockets are perfect for riders looking for longevity and value for money from their sprockets, without compromising on quality. Certified Hi-Carbon Steel offers unbeatable wear properties and its added strength in comparison to mild steel, allows for a lighter profile design to ensure the weight increase over aluminium is kept to a minimum.

LASER CUT

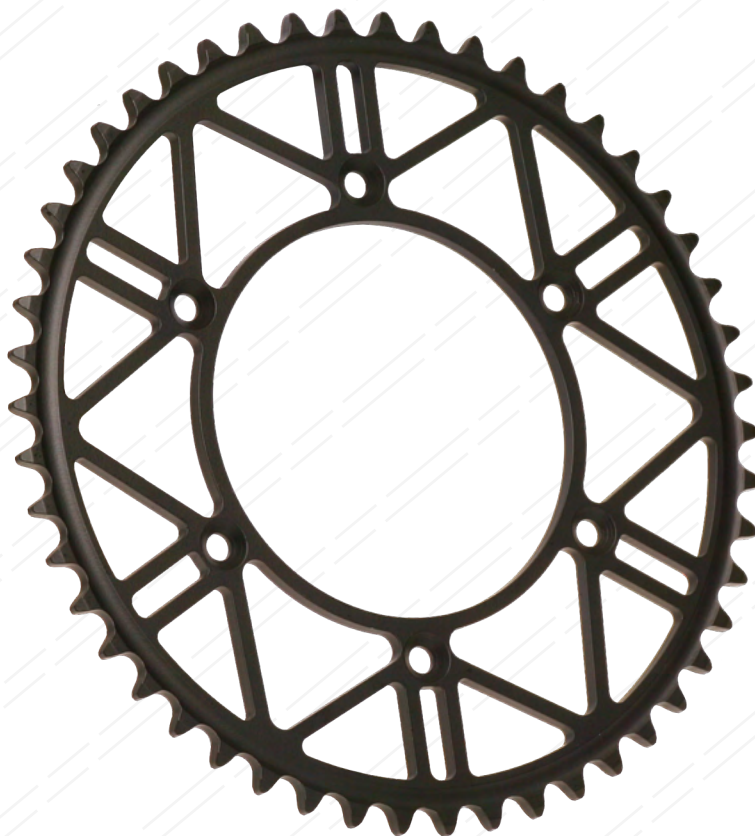

HIGH-CARBON
STEEL

FEATURES

- Certified Hi-Carbon Steel
- CNC laser cut
- CAD designed profile for lightness

WHEEL SPACERS

RFX Pro Series wheel spacers are constructed from 7075-T6 aluminium with an anodised finish and this results in a lighter and more durable component in comparison to OEM.

The wheel spacers reduce surface wear and minimise the amount of dirt entering the hub which in turn extends the life of the bearing.

Designed with a rear lip which helps to keep them hooked into the seals, this decreases the chance of falling out during maintenance and speeds up wheel changes.

FEATURES

- 7075-T6 Aluminium Construction.
- Colour anodised for durability.
- Machined rear location lip.

TRANSPORT ACCESSORIES

TIE DOWNS

RFX Tie Downs are designed to safely secure motorcycles in transit. With 25mm wide nylon webbing for added strength and a caribiner clip to quickly secure the tie down and remove the frustration of the hook being able to fall off the van eyelet prior to tightening the straps when securing the bike in place.

Each strap is 2m in length and features an extra extension loop which is useful for bikes with oversized bars.

Available in 6 different colours

FEATURES

- Pack of two tie downs
- 25mm wide nylon webbing straps
- 2 metres in length
- Extra extension loop
- Caribiner attached to one end for fast and secure fitting

SINGLE PILLAR H BIKE STAND

A heavy duty single pillar H lift up design. Manufactured from heavy duty steel and designed with a wide stand footprint for stability and a non-slip rubber mat for bike security.

The single pillar design features a solid nylon bush and a lever arm with a progressive linkage to provide the smoothest and easiest action possible.

Powder coated to resist fading in sunlight and washing chemical contact. Available in six colours to suit 125cc-600cc machines.

RRING

BEARRINGS

BEARING KITS

RFX Race Series Bearing Kits are an affordable solution for customers in need of replacement motorcycle chassis pivot bearing kits. Supplied complete with all bearings, bushes and seals required for a one stop rebuild of your motorcycle or ATV chassis and suspension.

Kits are provided separately for each individual pivot point.

RFX use only premium quality bearings and seals in their Race Series chassis rebuild kits.

FEATURES

- Full complement bearing design for increased load resistance
- Precision ground needle rollers
- Cadmium plated bushes for increased durability
- Meets Original Equipment Manufacturer (OEM) Standard
- Contains all bearings, seals, washers and collars needed
- Kits available for most models

A STEERING HEAD BEARING KIT

B FORK SEAL KIT

C FRONT WHEEL BEARING KIT

D SWING ARM PIVOT BEARING KIT

E LINKAGE BEARING KIT

*Includes lower shock bearing

F REAR WHEEL BEARING KIT

G UPPER & LOWER SHOCK BEARING KIT

	YL Yellow

FXGP 51000 55OR

Pro Series products are CNC machined using only the highest grade aerospace aluminium to produce products for the pro level racer where machine failure is not an option.

Race Series products are manufactured using a metal forging process to increase inner core strength and resist damage in collisions.

Sport Series products are designed and manufactured at a price suitable for all racing budgets utilising mass production techniques such as die casting to drive down the cost of everyday racing items, whilst maintaining a quality suitable for the average racer.
